

(A)

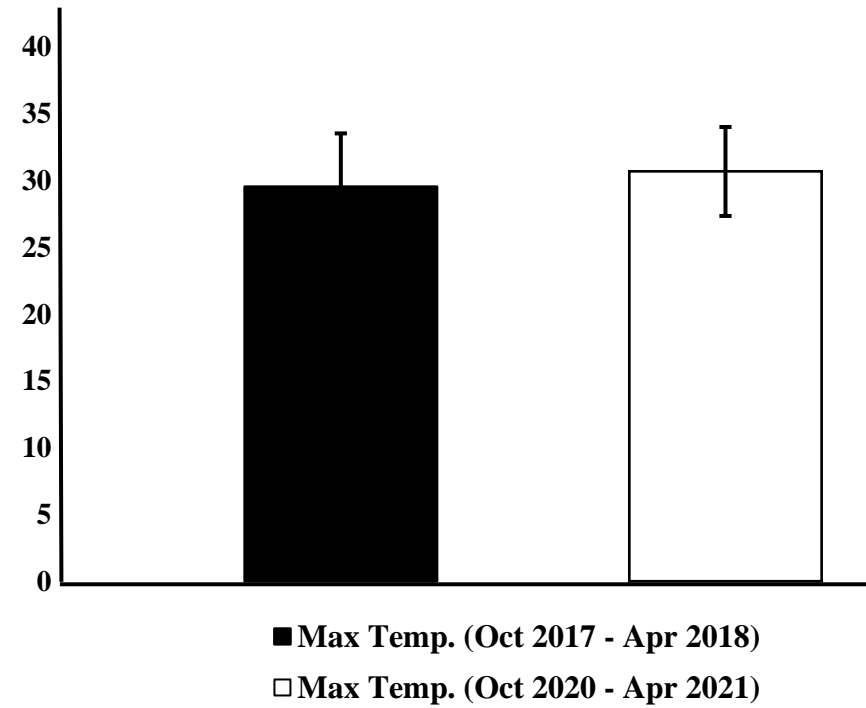

S1 FigA: Minimum temperature (Average \pm S.D) observed in both vintages. No significant difference was observed ($p > .05$)

(B)

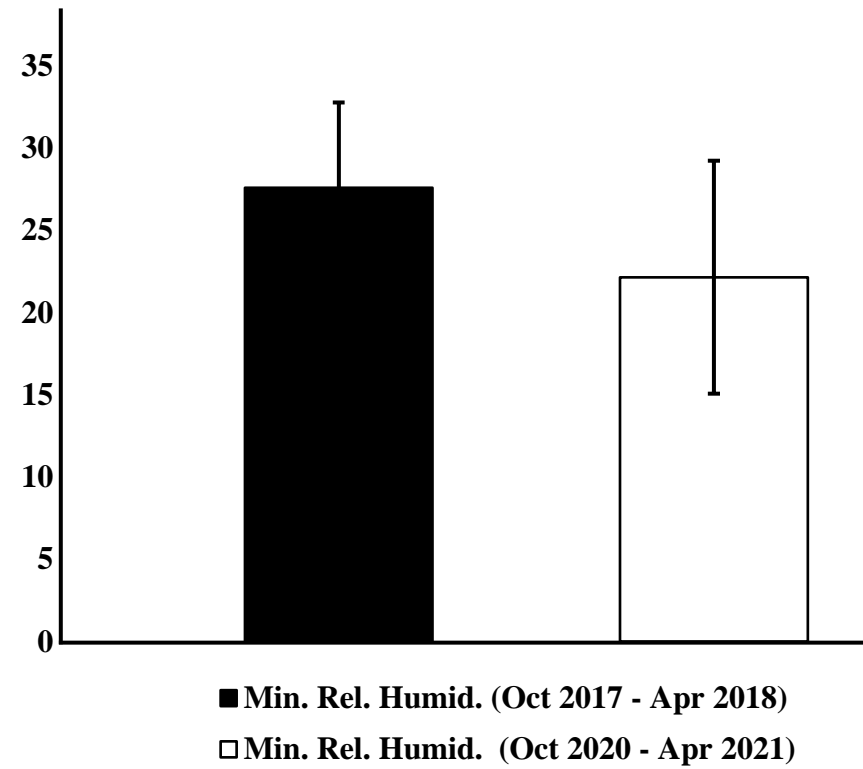

S1 FigB: Average temperature (Average \pm S.D) observed in both vintages. No significant difference was observed ($p > .05$)

(C)

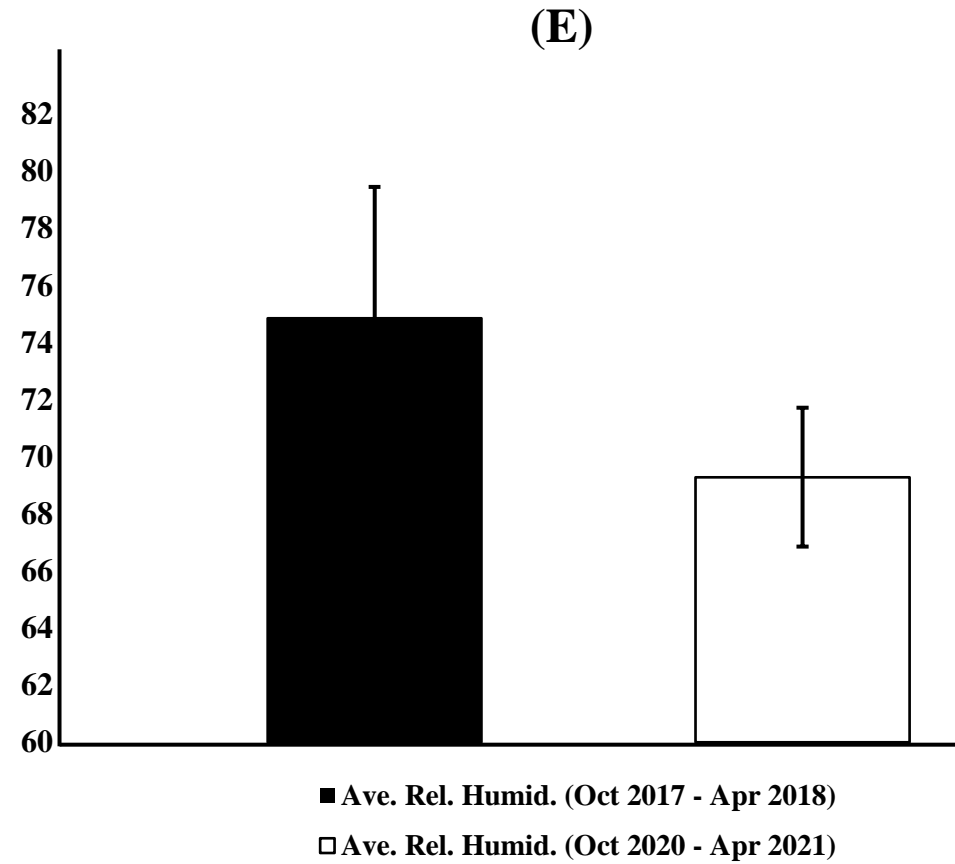

S1 FigC: Maximum temperature (Average \pm S.D) observed in both vintages. No significant difference was reported ($p > .05$)

(D)

S1 FigD: Minimum relative humidity (Average \pm S.D) observed in both vintages. No significant difference was observed ($p > .05$)

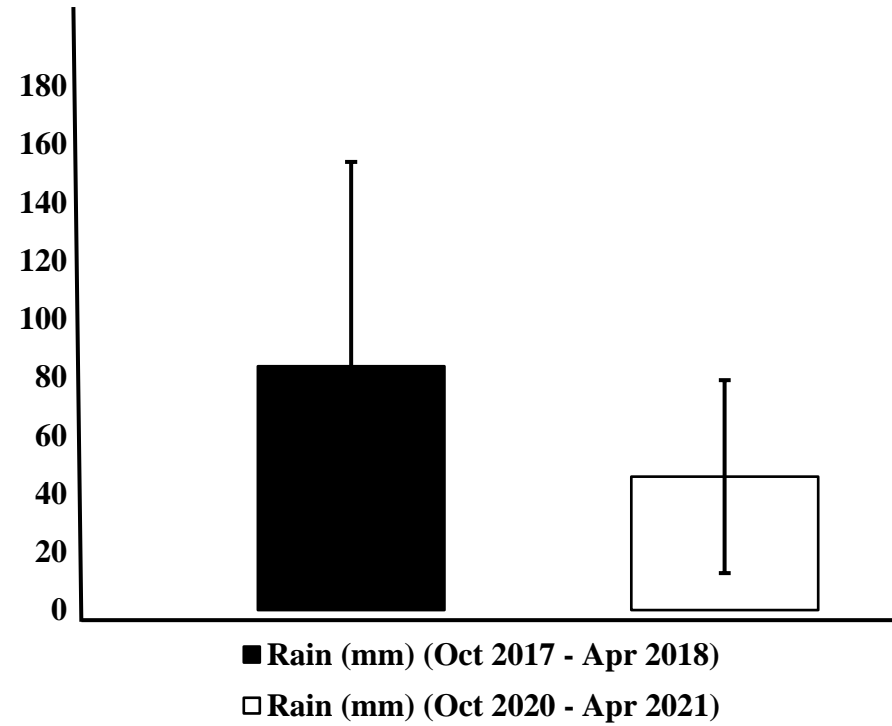

S1 FigE: Average relative humidity (Average \pm S.D) observed in both vintages. Significant difference observed ($F(1,12) = 8.03, p = .0151$)

S1 FigF: Maximum relative humidity (Average \pm S.D). Significant difference observed ($F(1,12) = 105, p = 3e^{-7}$)

(G)

S1 FigG: Rain (Average \pm S.D) observed in both vintages. No significant difference was reported ($p > .05$)
